FAASTeam presents:

Eagles Nest IFR Club - Instrument Flying and Better ADM

Join the Eagles Nest Aviation Society for the inaugural meeting of the Eagles Nest IFR Club—a gathering of pilots interested in sharpening their instrument flying skills and making better decisions.

Mike Canfield, CFII at Eagles Nest Flight Services, leads us through realistic flight scenarios and guided discussion, participants will consider changing conditions, weigh their options, and explain how they would respond. Topics will include weather, flight planning, instrument procedures, personal minimums, cockpit workload, and the pressures that influence pilot judgment.

Each meeting draws on the experience of the group. Whether you regularly fly in IMC, are returning to instrument flying, or are working toward your rating, your questions and perspective are welcome.
