FAASTeam Greater Chicago GL03 presents:

CFIT Avoidance Technology

Surprisingly, more than 75% of CFIT accidents occur in daylight and more than one-third of the pilots involved hold instrument ratings! There are numerous CFIT avoidance technologies available to general aviation pilots. This presentation will acquaint you with techniques and technologies that enable CFIT avoidance.

This is a one-hour presentation.

Those flying in may park on the east ramp. Those driving in may park in the west lot.
