FAASTeam presents:

Monthly meeting of Columbus EAA IMC Club Mastering the Art of Instrument Navigation

In addition to the tangible differences that exist when moving to higher performance (HP) and turbo-prop aircraft, John Walters will discuss the opportunities and challenges all pilots face when stepping up to these levels of airplanes. In every case, things happen much faster and advanced, initial and recurrent training is required, especially with respect to engine operating procedures and emergencies. John's presentation will focus on 3 to 4 actual situations that occurred and how he handled them. John will conclude with essential recommendations when moving to a HP and turbo-prop aircraft.

Directions: Go to http://www.quest-centers.com/ for a map and/or directions to the Quest Conference Center. (The QCC is southeast of the I-71-Polaris Parkway Exchange). Enter at the Main Entrance, you will be directed to the meeting room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
