

How do We Stop Losing Control of our Airplanes

Every four days, there is a fatal accident involving loss of control. Over the past 70 years, Loss of Control is and has consistently been one of the leading causes of airplane crashes and crash-related fatalities worldwide, and it happens to pilots of all skill levels. In this presentation, we will learn about the leading causes of Loss of Control and how you can prevent them from claiming your life.

Directions: The FAA Safety Center Forum is located next to the Air Traffic Control Tower. There is a cost to enter the Oshkosh AirVenture Air Show but all the seminars at the FAA Safety Center are free.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
