

Taking Command Leadership for GA Pilots

Over the course of history, we have seen the consequences of ineffective leadership in both general aviation and commercial aviation. As the pilot in command, we are expected to be leaders of our aircraft and our passengers. The majority of human factors related accidents incorporate leadership as a contributing factor, and in this seminar, we will discuss ways to take command of your airplane and be an effective leader.

Directions: The FAA Safety Center Forum is located next to the Air Traffic Control Tower.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
