AirVenture 2023 Forum - Common Cause of Fatal Accidents

In Flight-Loss of Control (IF-LOC) has been the most frequent cause of fatal aviation accidents since the dawn of aviation. Even commercial jets suffer from IF-LOC fatalities more than anything else. The FAA now requires that all FAR Part 121 Air Carrier Pilots complete annual training in stall recognition, stall recovery, upset recovery, slow speed maneuvering, and other maneuvers. This presentation will show you how you can add this training to your personal training program, as well as other techniques that will help you become a safer, more proficient pilot.
WINGS/AMT credit available!
To receive WINGS/AMT credit fill out attendance sheet available at the Forum entrance.

Directions: The FAA Safety Center is centrally located on the EAA AirVenture grounds on the South side of the control tower. We are the large tan building with the rooftop deck facing the runway. Forums entrance is on the west side of the building.
Prior to attending a safety seminar, please review and abide by current CDC, State and local health guidelines.

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
