

# AirVenture 2024 Forum - Colorado Mountain Flying and Mountain Weather

Colorado's airports experience high density altitudes, even along the Front Range, so pilots must plan for the decreased aircraft performance they will find. The mountains also cause unexpected weather conditions that are often hazardous to aircraft. We will give a brief overview of these and other things to consider when planning a trip to the Colorado high country.

## **WINGS/AMT credit available!**

**To receive WINGS/AMT credit fill out attendance sheet available at the Forum entrance.**

The FAA Safety Center is centrally located on the EAA AirVenture grounds on the South side of the control tower. We are the large tan building with the rooftop deck facing the runway. Forums entrance is on the west side of the building.

**Prior to attending a safety seminar, please review and abide by current CDC, State and local health guidelines.**
