

AirVenture 2026 Forum - Its a Risky Business

The interactive program is designed for both the pilot and mechanic to use ADM and Risk Management Skills to better consider and identify the various factors involved with that next flight that may not be apparent at first glance. Using many real life examples, the session will review human factors, maintenance failures, performance issues, glass cockpit failures, and offer insights into methods of risk re-assignment/transfer to make for a safer flying experience.

WINGS/AMT credit available!

To receive WINGS/AMT credit fill out attendance sheet available at the Forum entrance.

The FAA Safety Center is centrally located on the EAA AirVenture grounds on the South side of the control tower. We are the large tan building with the rooftop deck facing the runway. Forums entrance is on the west side of the building.

A message from the National FAASafety Team Manager
