

## Tool Box Talk - A Mechanics Pre-Flight Inspection

Step into the maintenance hangar and follow along as Mark Hasner of Chena Marina Air Service conducts a Mechanic's Pre-flight Inspection. Upon completion of the pre-flight, remove the engine cowl and learn visual inspection techniques specific to the firewall forward while completing preventative maintenance on your engine. Before we conclude, Isaac Mackey will discuss ramp operations around operating rotorcraft as well as rotorcraft wake turbulence and its impact on fixed wing flight operations.

University Avenue South to the East Ramp and then the first hangar on the right. Go in through the main doors; the hangar is through the doors on the left right past the restrooms.

### A message from the National FAASTeam Manager
