FAASTeam presents:

Special VFR at Non-Towered Class E Surface Areas

Temporary closures of Flight Service Stations in Western Alaska has driven an increase in operations prompting reliance on the Fairbanks Flight Service Stations. This presentation is intended to raise awareness regarding Special VFR regulatory requirements and the associated Airman Information Manual in addition to the Air Traffic Orders that govern these types of Operations. ADS-B usage and the various services provided will also be highlighted. We will discuss the regulatory requirements and encourage its use by an in depth review of the benefits of participation aligning with the Don Young Alaska Aviation Safety Initiative (DYAASI). Finally, we will provide an overview of recent accident statistics in Alaska.
