FIELD APPROVAL MEETING & OPEN FORUM DISCUSSION

Federal Aviation Administration

Alaskan Region Flight Standards Division
222 W. 7th Ave., #14
Anchorage, AK 99513

Field Approval Meeting & Open Forum

In June of 2011, the guidance that FAA Aviation Safety Inspectors use to perform Field Approvals of major repairs and major alterations changed. Specifically, Figure 4-68 of FAA Order 8900.1, Volume 4, Chapter 9, Section 1 was revised.

Although this change in the Airworthiness Inspectors Handbook has affected the timeliness to approve some major repairs and major alterations via Field Approval's, the FAA is still processing Field Approvals.

The FAA is hosting an event to convey recent changes to the Field Approval process and to solicit feedback and recommendations from the Alaskan industry groups, repair stations, air carriers, mechanics, pilots and the general public.

EVENT SPEAKERS:

- Steven Douglas, Manager of FAA Aircraft Maintenance Division, Washington D.C.
- David Hempe, Manager of FAA Aircraft Engineering Division, Washington D.C.
- Clint Wease, Manager of Alaskan Region Flight Standards Division, Anchorage AK
- August Asay, Manager of Anchorage Aircraft Certification Office, Anchorage AK
