

Topic of the Month-Preflight in a Box

The General Aviation Joint Steering Committee (GAJSC) Loss of Control Work Group studied a group of General Aviation accidents that may have been caused by inadequate preflight inspection. THE GAJSC feels that thorough preflight inspections, with special attention given to systems and components that have recently undergone maintenance activity, are essential to flight safety. The following will be covered...

Event Details

Thu, Feb 29, 2024 at 18:00 CST

**Southeast Iowa (Burlington)
Regional Airport**

2515 Summer St.

Burlington, IA

Contact: Jason Glass

- Aircraft document review. This is particularly important after maintenance activities, not only to ensure that maintenance has been performed but also that the aircraft has been returned to service.
- Mitigating distractions and human factors affecting the outcome of a thorough preflight.
- A Hands-on Exercise to confirm the learning process and to allow the attendees to practice the skill of a good preflight.
- The Importance of verifying that the aircraft has been returned to service after maintenance and the aircraft appears to be in an airworthy state.
