

Vestibular Illusions

This event will cover the following:

- How humans perceive their relationship to the flight environment can result in inappropriate control input.
- In-flight illusions can precipitate inappropriate control inputs.
- Education and training in coping with in-flight illusions can improve pilot response to illusions.
- Vestibular Illusions are particularly dangerous because they can lead to loss of aircraft control.

This event will take place at Indian Hills Community College, North Campus, located at the Ottumwa Regional Airport.
