Fred.Harms@faa.gov

There is always the possibility that something unexpected might occur on a flight that could lead to an off-airport landing and a survival situation for ourselves and our passengers. This program will examine practical ways to use what's available on the aircraft and in the environment to survive until rescue. Tips on safety in and around helicopters will also be reviewed since that may be how the rescue will happen. This seminar will be presented in-conjunction-with the St. Louis Helicopter Association Fly-in.

*Directions:* Exit I-44 onto the North Service Road at exit 242 or exit 247. Follow the North Service Road to Highway AH, then to Iron Hill Road. Follow the signs to the Helicopter Fly-in.

*Message from the National Safety Program Manager:*

**Safety is a learned behavior...Learn to be safer at the Learning Center found on  
FAASafety.gov**
