

Engine Maintenance and Performance Monitoring - Another GAJSC discussion with PIZZA

The General Aviation Steering Committee (GAJSC) System/Component Failure work group contends that inadequate engine maintenance has led to a significant number of general aviation power failures. The GAJSC also feels that flight data monitoring can help to forecast system/component problems before they reach the point of failure.

Directions: Spirit of St. Louis Airport is in Chesterfield, Missouri. Head west from the Chesterfield Commons shopping area on Chesterfield Airport Road. Look for the sign to enter the airport. Follow that road straight southbound until it dead ends into Edison Road. Take Edison until it dead ends in a parking lot. Park your car. Hangar is on the south side of the parking lot.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
