

FAASTeam presents:

Bonanza / Baron Landing Gear Systems and Maintenance

The landing gear system of Beech Bonanzas, Debonairs, Barons and Travel Airs is very robust and reliable. But it takes inspection and regular maintenance to ensure it works properly every time.

ABS Senior Technical Advisor Bob Ripley discusses the inspection and maintenance requirements of the Beech landing gear system, and recommendations for operation and attention that result from his decades of experience as owner of a Beech specialty shop and ABS Service Clinic inspector.

Directions: To access this American Bonanza Society LIVE Broadcast - [CLICK HERE](#)

REGISTRATION IS NOT REQUIRED to view this broadcast as there is no limit to the number who may attend this live course.

UNABLE TO ATTEND THE LIVE BROADCAST? You may access the ARCHIVED program at any time after the Live Broadcast via the link above on virtually any internet connected device.

WINGS CREDIT is earned by completion of a short quiz on FAASafety.gov
