

FAASTeam presents:

ABSWeb - Autopilots and GPSS

The amazing combination of WAAS and GPSS makes automated flight smooth and easy, but the interface between these systems and autopilots—especially legacy autopilots—is not always intuitive.

Kevin Crozier is a BPPP instructor, FAA Designated Engineering Representative (DER). In this program, Kevin will address considerations for flying with autopilots and GPSS, including:

- A review of legacy autopilots, their components and operation.
- Introduction to GPSS roll steering and how it works.
- How to use GPSS roll steering in all phases of flight.

Viewers will be able to type in their questions to be answered during the event. We will explain how to do so at the beginning of the webinar.

Directions: To access this American Bonanza Society LIVE Broadcast - CLICK HEREREGISTRATION IS NOT REQUIRED to view this broadcast. There is no limit to the number who may attend this live course, and there is no additional software to download. Click on the link above at the scheduled time to view the program.UNABLE TO ATTEND THE LIVE BROADCAST?
