

FAASTeam presents:

# ABS - Staying Sharp In Multiple Airplanes

During this program we will cover:

- Cockpit flows that can work in every aircraft.
- Tips on how to get used to new automation; and
- How to gain insight into the engineers' mind when they designed the aircraft, to help you understand the logic of aircraft systems design and operation.

Viewers of the live presentation will be able to type in their questions to be answered during the event. We'll explain how to do so at the beginning of the webinar. This program is recognized for ABS AVIATOR and FAA WINGS credit.

Although this American Bonanza Society program is oriented toward pilots of Beech Bonanzas, Debonairs, Barons and Travel Airs, the discussion, techniques and procedures described are valuable to the pilot of any airplane.
