

## ABS - Flying Light Twins Safely

Noted airshow performer and multiengine instructor Doug Rozendaal takes a deeper dive into flying light twins than you probably learned in that three-day multiengine course all those years ago. For experienced twin engine pilots and those new to multiengine aircraft this discussion will cover:

- The drill: How ritual makes sense out of chaos.
- The  $V_{MC}$  Demonstration: How and why the benign yaw event done in training becomes a violent snap roll in practice.
- Partial power loss: How to identify and deal with the insidious partial loss of power as compared to total engine failure.
- Turning into the dead engine: Slaughtering the sacred cow that turning into a failed engine is deadly.
- Answers to viewer questions

### Event Details

**Tue, May 14, 2024 at 19:00 CDT**
