Lead Representative JOHN

Right Seat Ready is a comprehensive hands-on safety course that provides personalized education on aircraft systems, dynamics of flight, emergency procedures, emotional response, and much more. Utilizing Redbird simulators, students learn to safely take control of a single engine airplane, including landing.

The EAA Pilot Proficiency Center is located on the southernmost corner of the EAA Aviation Museum building. The EAA Aviation Museum is on the east side of Interstate 41 about ½ mile south of the intersection of I-41 and Wisconsin State Highway 44. Look for signs directing you to EAA if coming from I-41 or WI-44.

Note that this event is happening during the EAA AirVenture 2025 event which draws thousands of attendees each day. You will likely have to pay for parking, and overnight accommodations could be challenging to find.
