

Murphy Was Wrong

Living and working in an aviation environment where human nature isn't always helpful.

Additional information: In the 1970s and 80s, Murphy's Law was a popular topic. From a simple statement, "If

anything can go wrong, it will," hundreds of laws, maxims, axioms, corollaries, credos, and rules have been

written to expand on the statement for just about every discipline imaginable. In aviation safety, however, the

reality is that Murphy was wrong!

Please use your GPS to provide detailed directions to the meeting location.
