

The Schiff Show - Pilot-Mechanic Checks and Balances

On this episode of THE SCHIFF SHOW, Brian welcomes Jeff Simon from SocialFlight for an engaging discussion about a real-world accident where a mechanic's mistake created a hidden hazard that the pilot failed to detect during pre-flight inspection, followed by a failure to follow emergency procedures, and how that combination led to tragic results.

Training goals:

Foreign, FN

- Identify common types of maintenance errors that can lead to hidden in-flight hazards, using real accident case studies as examples.
- Strengthen pre-flight inspection skills to better detect subtle signs of mechanical mistakes or overlooked maintenance issues before flight.
- Understand the importance of effective pilot-mechanic communication and specific questions pilots should ask after maintenance is performed.
- Apply best practices for verifying airworthiness and implementing safety habits (SOPs) that prevent maintenance-related accidents.
- The importance of following established procedures to serve as a safety barrier.

Registration is not required. After viewing the program, WINGS Credit is earned immediately upon successful completion of a short quiz. The link to that quiz is on the page noted below.
