

The Schiff Show - Weather or Not? Avoiding The Bad Stuff

An upgraded Cessna 421C, advanced weather tools, a professional pilot, and plenty of warnings —yet N4467D still penetrated a severe storm, lost control, and came apart in the Gulf of Mexico with five fatalities.

In this episode, THE SCHIFF SHOW welcomes Greg Reverdiau, aviation educator, human factors specialist, and co-founder of Pilot Institute, one of the largest online training platforms for manned and unmanned pilots.

Together, we will replay the flight, the ATC exchanges, the convective SIGMET environment, and the weather technology picture that set this crew up for disaster.

Registration is not required. After viewing the program, **WINGS Credit** is earned immediately upon successful completion of a short quiz. The link to that quiz is on the page noted below.
