FAASTeam presents:

Ambiguity Is the Hazard - How Uncertainty Degrades Judgment

Ambiguity degrades decision-making across aviation.

Conflicting instrument indications, unclear ATC instructions, incomplete maintenance data, and competing operational priorities all create mental ‘fog.’ This episode trains aviators to recognize ambiguity early, slow down appropriately, seek clarification, and act deliberately—whether in the cockpit, the maintenance shop, the control room, or on the ramp. Aviation maintenance technicians (AMTs) experience this fog through incomplete records, conflicting indications, and unclear maintenance history.
