

IMC Clubs - Mastering the Art of Instrument Navigation: LORAN- is it coming back?

Almost all of us are totally dependent now on the satellites that provide our means of navigation. And although this system has a lot of advantages over VORs, our VOR system has one big advantage over GPS - it is a lot more difficult to destroy a national VOR system than it is to destroy a national GPS system. IMC member Mark Bukowski has a working knowledge of the Enhanced LORAN system that the Department of Transportation is thinking about as a backup to GPS, and he has agreed to share that with us this month.

Directions: I find it easiest to get myself to the intersection of 115th and Nall, and then go east, one short block to Ash. Turn right onto Ash, and then take the second right turn into the parking garage. If you travel up to the fourth level, there is a walkway that enters into Suite 300. CALL IF YOU NEED ME - 816-868-7655

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
