

Kansas City FSDO FAA Safety Team presents:

Missouri Pilot Association Forum - ADS-B Discussion

ADS-B is transforming all segments of aviation. Real-time precision, shared situational awareness, advanced applications for pilots and controllers alike – these are the hallmarks of ADS-B NextGen surveillance. Real-time ADS-B is used now for air traffic control. General aviation is safer with ADS-B traffic, weather, and flight-information services. Safety and efficiency improve with advanced ADS-B applications. Come and learn about ADS-B, regulations, and how you can equip your airplane.

Directions: From I-70 East or West bound, exit at Noland Road and then turn South, travel approximately 1 mile to Missouri Highway 40 and turn left (East) for approximately 3 tenths of a mile and you will see the Disabled American Veteran's Hall on the right side (South) of Highway 40 and turn into the parking lot.
