

FAASTeam presents:

Aviation Weather Center - FLYERS Beta AWC Website

AWC has been working on a significant upgrade to the website to improve the site's consistency, supportability, mobile friendliness, performance, ease of use, and ease of new development. The proposed upgrade will be hosted at <https://beta.aviationweather.gov> through October 31, 2022. This will allow enough time for users to explore the capabilities of the upgraded site, acclimate to the changes, and identify any critical issues for AWC web developers to resolve before the upgraded site replaces the existing site at www.aviationweather.gov.

Directions: The workshop will be presented via GoToWebinar and will require registration. Please register at <https://attendee.gotowebinar.com/register/6085578481969836560>. In most cases a simple download of the GoToWebinar applet is required. Pop-up blocker will need to be disabled to download the applet. If you need additional resources for utilizing GoToWebinar, please visit the GoToWebinar Website (www.gotomeeting.com/webinar). The webinar will last approximately 45 minutes.

A message from the National FAASTeam Manager
