

FAASTeam presents:

Aviation Weather Center - FLYERS Turbulence Workshop

To help pilots mitigate accidents related to turbulence and low-level wind shear, the Weather-Ready Nation (WRN) FLYERS (FLYing Education, Resources, and Safety) team will be hosting a virtual webinar on turbulence education and avoidance. The free virtual webinar will cover the basics of turbulence and low level wind shear, including how NWS aviation forecasters warn pilots of these hazards and where pilots can find turbulence information online. The webinar will last approximately 2 hours.

Keynote speakers will be Commander John Rossi and Mr. Mark Boguski. Commander Rossi currently serves as the Aviation Weather Center's NOAA Executive Officer in addition to his duties as a WP-3D Hurricane AC pilot and King Air Instructor. Mr. Boguski is the Chief Flight Instructor for LIV2FLY Aviation, has over 3000 hours of flight time, and teaches pilot ground school and aviation weather classes at a local college. CDR Rossi and Mr. Boguski will share anecdotes and advice based on their vast experience with turbulence training, education, and avoidance.
