

IMC Clubs - When the autopilot is not your friend

Pilots who return from a long layoff from flying are often amazed and a bit overwhelmed at the state of the “basic” instrument panel. Gone is the six-pack of round instruments and VORs, replaced with digital gauges and a moving map / GPS. But now also considered almost essential to any panel is a real working autopilot. For today’s instrument pilot, a working pilot is a best friend. Until it turns against us.

Has the autopilot ever turned against you in flight? Come share your experiences with those who have not seen this situation (but who will!)

Take I-470 to Exit 9, Douglas Drive / Lee's Summit Road turn north. At the bottom of the hill, turn right and follow the road to the end. The Larry Young hangar is on the west side of the parking lot under the Cessna on a Post.
