# ABS Flight Instructor Academy Camarillo, CA June 9, 2013

## Learn “How to Teach Beech”

The American Bonanza Society and the ABS Air Safety Foundation announce the **ABS Flight Instructor Academy LIVE classroom event**. This innovative new program is an industry-changing effort to improve all Beech pilots' performance, confidence and safety by **teaching CFIs** what we've learned in over 30 years of presenting the Beechcraft Pilot Proficiency Program. Our goal is nothing less than to **assure all Beech Bonanza, Debonair, Baron and Travel Air pilots have access to safe, type-knowledgeable flight instructors** for local training.

Instructors who complete the ABS Flight Instructor Academy LIVE program will have their name, business name (as applicable), location and contact information listed on the ABS website. Current and prospective ABS members and Beechcraft pilots will be able to see this referral list when looking for an instructor for transition and recurrent training, flight reviews and instrument proficiency checks. By completing an interview and a check flight with a BPPP Standardization Check Pilot on a later date, ABS Flight Instructor Academy graduates may be eligible to become a contract instructor for the Beechcraft Pilot Proficiency Program (BPPP).

**Become a safer, more proficient instructor in Beech airplanes.  
Increase your instructional business by serving the members of the  
American Bonanza Society.**
