

# Manipulation of the Flight Review: To change by artful means so as to serve one's purpose.

The flight review is a vital link in the general aviation safety chain. The purpose of the flight review is to provide for a regular evaluation of pilot skills and aeronautical knowledge. The flight review is also intended to offer pilots the opportunity to design a personal currency program in consultation with a CFI. The CFI should tailor the flight review and proficiency plan to each pilot's skill, experience, aircraft and personal flying goals.

**Directions:** Conference Room Terminal Building Main Lobby

## A message from the National FAASafety Team Manager

Over 136,600 pilots earned WINGS credits last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
