

Icing Insights

Whether your airplane is certified for Flight Into Known Icing (FIKI) or not, icing is a hazard that should have every pilot on alert. Understanding the impact icing can have on a flight means knowing where favorable icing conditions are forecast, at what altitudes and over which regions. In Icing Insights, we'll show you how to get the most out of the latest icing detection and forecasting tools, as well as provide a few insights that will help make you more confident when it comes to planning around icing conditions.

Directions: You will receive a confirmation email within 24 hours of the webinar from Erin Hess (webinars@jeppesen.com). That email will contain your unique link to the webinar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
