

FAASTeam presents:

Climate and Global Weather Patterns – How They Impact Your Flying

“Climate is what we expect, weather is what we get.” This Robert Heinlein quote describes the difference between climate and weather. Pilots are trained to know WHAT the weather is doing and what it is expected to do during a flight. But have you ever asked WHY? Why do you get the weather you get where you fly? Where does it come from? How does it arrive? Where does it go? Where does it end, or does it? In this webinar, we'll look at weather on a global scale, show you how the weather around the world is interconnected and help you see how a weather system in Shanghai, China can impact flying over Sheboygan, Wisconsin... and every point in between.

Directions: To attend the “Climate and Global Weather Patterns – How They Impact Your Flying” webinar, please register using this link:
<https://cc.readytalk.com/r/tx955rlxiedw&eom> . Once you register, you will receive a confirmation email that will contain your unique link to the webinar.
You will not need to register on the faasafety.gov site to receive credit for attending this online webinar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
