

Taming Turbulence Encore Presentation

Turbulence can run the gamut from a choppy annoyance to creating loss of control and safety of flight events. Knowing how to detect and avoid turbulence is a critical part of flight planning, managing passenger expectations or even making a go/no go decision. In this encore presentation of our Taming Turbulence webinar, we'll review the latest tools to help you determine where turbulence currently exists, where it's forecast to develop and how to better use those insights to plan and operate in order to minimize the impact of turbulence on future flights.

Directions: To attend the Taming Turbulence Encore Presentation webinar, please register using this link: <https://cc.readytalk.com/r/yifpb9gq36fa&eom>
Once you register, you will receive a confirmation email that will contain your unique link to the webinar.
You will not need to register on the faasafety.gov site to receive credit for attending this online webinar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
