

# Communications and the Effective Flight Review

Radio communications are a critical link in the ATC system. Our discussion will cover basic procedures for new pilots and also highlights safe operating concepts for all pilots. We will also discuss the Flight Review specified in 14 CFR 61.56, review the basic requirements and FAA recommendations for conducting an effective Flight Review. This will be an interactive presentation and your participation is encouraged!

**Directions:** Please view the Map for directions. The seminar will be held upstairs, above the Collegedale FBO.

## A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
