

## Nashville IMC Club Monthly Meeting

This month's scenario will test your tolerance for risk when flying near areas of forecasted icing conditions. You are "on top" cruising along in the clear, but below you is a widespread cloud layer containing areas of forecasted icing. As you continue along your intended route, the weather conditions you encounter are not consistent with the forecast and the situation deteriorates to the point where you need to make a critical decision now. Test your decision making skills in this critical area of IFR flying..

**Directions:** Meeting will be held in the offices of Nashville Flight Training. Please use map link to show location.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
