

## Taming The Taildragger

Are you considering learning the (nearly) lost art of operating a conventional gear, tailwheel airplane? Or, do you wish to hone your abilities and focus your attention on basic airmanship skills?

Please join Shelbyville Flight Training Academy's Joe Roberts, as he introduces us to the art of taming the taildragger. Also, FAA Safety Team Mgr., Bob Hill, as he speaks to the differences of both tricycle and tailwheel airplanes, (both single and multiengine) and addresses the challenges that lead to both conventional gear and tricycle gear airplane mishaps. Moreover, we are proud to have Mr. Charles McGaughy of Mack Air, discussing general maintenance of tailwheel assemblies.

**Directions:** Please utilize the map link. The EAA Hangar is adjacent to, and south of, the main terminal bldg.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
