

Nashville IMC Club Monthly Meeting

At the end of a long flight you just want to land, but a trainee controller and instrument practice traffic have created the perfect storm--and you've just been cleared directly into it. Can you trust a controller who's already made an operational error, or will you violate an FAR because you believe it will avoid a mid-air collision?

Directions: Meeting will be held at the Gassaway Building at Nashville International Airport. Please use map link to show location.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
