

## Spatial Disorientation As Seen From Accident Investigations

Please welcome Aviation Safety Inspector, Mr. Dave Lewis. In this presentation, we will focus on spatial disorientation and its effect as seen in many accidents. Aeromedical factors have been linked to poor decision making processes and ultimately, in-flight emergencies. Learn how information is gathered, analyzed and used to determine an outcome of an accident.

Reviewing this accident, we will provide some best practices for creating your own risk based Flight Reviews and also methods to avoid spatial disorientation.

This event will be held in Crystal Air's main hangar.
