

The Monthly EAA Chapter 1494 IMC/VMC Meeting

Please join our host, Certified Instrument Flight Instructor, Bob Dilk, as we discuss the importance of being thoroughly familiar with each aircraft we fly. Including: systems, emergency procedures, speeds, power settings, normal configurations, and flight characteristics.

Believe it or not, whether a pilot is transitioning from lower performance aircraft to higher performance aircraft or from higher performance aircraft to lower performance aircraft, the training can be just as challenging. Stepping down is as important as stepping up. Let's face it – we all want to get the best performance out of our flying machines and ourselves. Moreover, we want to do it safely

The meeting will be held in the Morristown Airport FBO main conference room.
