

The Monthly EAA Chapter 1494 IMC/VMC Meeting

Please welcome our host, Certified Instrument Flight Instructor, Bob Dilk.

Loss of control in the traffic pattern continues to be a cause of deadly aircraft accidents. This meeting will discuss what can be done to mitigate these events.

Topics to be discussed include Spin training, UPRT, and aerobatics. Upset prevention and recovery training is being promoted as a cure. And, aerobatic training teaches pilots to control the aircraft in all attitudes.

Join us for a spirited discussion of effective training techniques.

New Location! The new hangar on NE end of airport, next to the TCAT parking lot
