

The Monthly EAA Chapter 1494 IMC/VMC Meeting

Please welcome our host Bob Dilk, Certified Instrument Flight Instructor.

The use of Unmanned Aircraft Systems (UAS) or 'Drones', is expanding and beginning to replace traditional aircraft and helicopters for agricultural, survey, and package delivery. Their small size and high maneuverability can create a unique collision hazard with other aircraft. We will discuss what, where, and how these UAS operate and how the FAA designates airspace restrictions.

New Location! It will be in the new hangar on NE end of airport, next to the TCAT parking lot.

A message from the National FAASTeam Manager
