

Aviation Risk and Decision Making

The #1 cause for aircraft accidents is pilot proficiency. The #1 cause for deaths is Decision Making. David Perdue presents a seminar based on real world experience, on Risk, Situation Awareness & Decision Making to help general aviation pilots fly like the pros and fly smarter and live longer. In recent years, he has consulted with dozens of Fortune 500 companies including Wal-Mart, Lowe's, Target and Dow on how to improve their flight operations and make them safer and more efficient. This information is relevant no matter what you fly.

Directions: Main meeting room

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
