

Energy Management for All Pilots

Steve Dee, a local FedEx pilot who also flies gliders and a Vans RV, will discuss aircraft performance in gliding flight and in close proximity to the stall, along with spin and loss of control considerations - all critical aspects of flight which must be second nature to all pilots. We will also discuss inflight decision making in the above flight regimes, related stress factors and our natural panic response. Once we reach this point our decisions must be timely, instinctive, and correct.

Directions: Main meeting room

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
