

Rochester Air Center Monthly Hangar Flying!

Many pilots are deeply concerned about the high costs associated with owning and operating general aviation aircraft. As pilots, most of us are not mechanics by training or occupation, yet many of us derive satisfaction from working with mechanical things, especially aircraft. By performing routine maintenance on the aircraft you operate, you not only gain personal satisfaction but also become better educated about the equipment you fly, making you a better and safer pilot. Featured speaker Joe Hood, FAA Safety Team Representative will explain both what we can do and how to do it! Refreshments generously provided by the Rochester Air Center! We'll see you there!

Directions: Off 390 take Exit 17, proceed West and follow signs for RT-383, Scottsville Rd. Go .9 miles to 1313 Scottsville Rd. The last intersection is Airpark Dr.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
