

A New Frontier at Rochester WINGS 2015!

The Automatic Dependent Surveillance-Broadcast System (ADS-B) will change the nation's air traffic control system from one that relies on radar technology to a system that uses precise location data from the global satellite network. The FAA has mandated this equipment be installed for aircraft operating in certain airspace by January 1, 2020. What does this mean for you? What is ADS-B and how will it affect your aviation operations? What equipment is required? Learn the answers to all of these questions and many more at this informative briefing presented by Freeflight Systems! FREE coffee and donuts provided by Artisan Flying Club. Click on the link below and register TODAY!

Directions: Take the NYS Thruway to Exit 46, proceed I-390N to Exit 17, turn right, proceed to 1295 Scottsville Road.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
