

How Do Winter Operations Affect Your Safety

Winter flying in New York State can adversely affect flight operations. Poor weather conditions with fast moving fronts, strong and gusty winds, blowing and drifting snow, and icing conditions are just part of the conditions that require careful planning in order to minimize their effects. Operation in this environment requires special winter operating procedures. This program will also feature a discussion of what owners can do to ease winters grip on the aircraft before we fly. These are just a few examples of the issues we'll discuss at this informative briefing. Don't miss it! Click on the link below and register TODAY.

Directions: Rt 209 to Enterprise Dr. North 1/10 mile left to Town Hall complex. Senior Center building is on left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
