

Mountain Flying and Research in Alaska

Troy Dunn will discuss the science and techniques employed in maneuvering flight during mountain operations. He conducted wolf research for over a decade in Alaska. The items we will cover start from the early mission planning all the way through the flight conclusion. You will learn just how much is involved in a successful flight. This seminar is informative to both pilots and non-pilots as there will be discussion on Alaska's wolves and their interaction with their environment. Please make time to stop by and participate in this seminar and bring a friend.

Directions: From Route 7 in Great Barrington, MA, travel west on Rt. 23, turn west on Rt. 71. The airport is approximately one mile on the right. Aircraft parking available on grass area near FBO. Limited tie down spaces available.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
