

The Nuts and Bolts of Spins Stalls and Slow Flight Also an Introduction to ADS-B

What is ADS-B? An explanation of what it really means, does and where will I need it. Should I invest in it? What do I as a pilot need to know about ADS-B? How will this new technology enhance safety for those who operate with it. <https://www.faa.gov/nextgen/programs/adsb/> How can I be a more proficient and safer pilot while operating in slow flight and stalls? How important is the rudder in all of this? https://www.faa.gov/regulations_policies/advisory_circulars/index.cfm/go/document.information/documentID/1028760
