

WEATHER - Beyond the Standard Briefing

While most pilots know how to get a Standard Briefing, there are many less frequently utilized tools and places to find information the pilot can use to help make his/her "go/no go" decision. Where to find this information and how to use it are important to add to the toolbox of the safety-minded pilot. Decision making using this information should be considered as critical, not only for any long cross country flight, but even when flying short hops to your favorite airport diner as well. Doug will help us to consider how to use information and resources we may not have considered in the past to get a thorough weather briefing.

Directions: Kingston Ulster Airport located on RT 32 1mi North of 199 overpass.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
